Confident Sporty Look

High-performing and open to the elements by day, the Gran Turismo 41's generous spaces and peaceful atmosphere are comfortable and restful by night

Air Step Hull

Air Step® technology increases the Gran Turismo 41's speed and stability, by increasing the volume of airflow under the hull. She accelerates faster, optimising speed and reducing fuel consumption.

This patent has stood the test of time and offers excellent seakeeping, simpler passage through the waves, linear acceleration and sure footed handling in the curves. The "Air cushion" effect is reinforced by rear pads; V-shaped steps further improving the boat's stability.

Driving for Pleasure

With a central driving station, no vertical mullions in the middle of the windshield, and twin inboard Volvo 380 HP stern drive engines, the Gran Turismo 41 is firmly focussed on pleasure and driving sensations.

Contributing to her sporty design, the hard-top combines crew protection with a lifestyle open to the sea. The large electric sunroof is delivered as standard to add to the thrills.

Lounge Ambiance

Another hallmark of the Gran Turismo 41 is that she is good for entertaining, as can be seen from the large saloon where guests face each other, as well as the aft sun bathing area placed at bench height for easier access, creating a real lounge space opening onto the sea.

Relaxing Atmosphere

The elegant grey walnut interior creates a bright modern atmosphere inviting you to relax. Two private cabins, each with beds parallel to the boat's centreline, make the most of the boat's full beam and are extremely comfortable.
